9:30 AM	-	Gaba	Lyra Infosystems Pvt. Ltd.	Talk of 25 minutes	Free/Libre Open Source Software Licenses - Classification & Understanding	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	-Technical and Legal interpretation of various licenses, like GPL, AGPL, CDDL, BSD, APACHE etcThe presentation will also emphasize upon the compliance part of circuit size and consideration of the company of the c	
10:00 AM	Andreas	Brău	freifunk.net	Talk of 25 minutes	The FOSSASIA API - know your communities	Open Source and Free Software	Let's get to know the FOSSASIA API. We take a look to the concepts. We can see tools and ideas. And we'll talk about further development.	
10:30 AM	Open Hardware and FashionTec	Lightning Talks						
	Cedric	Honnet	Tangible Display	Lightning Talk	Twiz: Tiny Wireless IMUz	Open Hardware and Makers		
	Ujjwal	Thaakar	Indiagames Ltd.	Lightning Talk	Open Sourcing Biology		The reason we all love open source is because it tepresents freedom and collaboration to us. It's a way of moving humanity forward by pooling together talent, effort, time and love to create spectacular things as a community. Today there is another community trying to embrace the same principles to anocelerate technology and bring it to everyone for the first time in the history of our species. That community is the diybio community. Let's understand them and help out.	
	Ayantha	Randika	University of Colombo School of computing	Lightning Talk	Fashiontec-Bodyapps- Android	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)		
	Prashant	Kiran	BodyApps - BodyViz - GSoC	Lightning Talk	A Talk on the 3D Body Visualiser Project.	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	The Talk will be an informative session about the Body Visualiser project , technologies used and the future scope of the project .	
	Vishv	Brahmbhatt	FOSSASIA	Lightning Talk	BodyApps Services	Libre Graphics / Open Design / FashionTec	Brief Introduction of BodyApps Services and technologies used in the project.	
	Alyssa	Quek	Alyssa	Lightning Talk	Computer vision	Python	Computer vision with python - how do machines see, process and understand the world.	
	Wan Leung	Wong	HKCOTA / TINYBOY	Lightning Talk	TinyBoy 3D printer for students : Follow up	Open Hardware and Makers	Follow up of the Tinyboy project with the printer creator, Parker Leung.	
11:30 AM	Michael	Cheng	Neo Innovation Inc.	Talk of 25 minutes	The secret to mastering any programming language	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	Programming is hard. But mastering it can be harder. My talk will be about some tips and tricks I've learnt in my 10+ years coding PHP, Objective-C, Javascript and Ruby in mastering any programming language.	
11:50 AM	Group	Photo		Photo	Group Photo	Wobile, Android)	Group Photo at Blk71	
12:00 PM								
1:00 PM		Gupta	Crystal Space	Talk of 25 minutes	Twisting pixels with Crystal Space	Open Source and Free Software	A introduction to an open source cross platform game engine; Crystal Space 3D	
1:30 PM		Denis-Courmon	VideoLAN	Talk of 25 minutes	VLC media player: news and future	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	VLC media player is one of the best known and most versatile open-source multimedia application. Originally a university project, the project transitioned to an open-source community. We will cover the recent and ongoing developments and tentative future work.	
2:00 PM	Health and Search	Lightning Talks						
	Samyak	Datta	Indian Institute of Technology, Roorkee	Lightning Talk	LifeNectar	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	Lack of connectedness is a leading reason for suicide. In order to reduce suicides we propose a digital journal, named LifeNectar, maintained by an individual to record his thoughts and emotions. Using Natural Language Processing, we analyse an individual's withing to extract his sentiments. This valuable information is then used to connect them with psychological experts and provide them a platform to discuss and sort their issues. The uniqueness of this idea lies in the fact that we are attempting to automate the process of connecting the persons having suicidal thoughts with professional expensis. In most of the cases, absence of this	
	Harsha	Siriwardena	OpenMRS	Lightning Talk	Open Source in Healthcare - The OpenMRS project		connection spells doom for the victim. I would like to talk about the value of Open source healthcare systems and specifically how OpenMRS project tries to solve healthcare sector related problems using Open source technologies.	
	Aarti	Dwivedi	Indian Institute of Technology Roorkee	Lightning Talk	AutistConnect Look Into The Future With	Open SourcelFree Software (Web, Java, JS, Git, Apps, Mobile, Android)	Autism/Connect aims to bring together autistic people and medical and behavioral experts under the umbrella of a social network. The primary user for our product is a child newly diagnosed with autism. He/she is most likely to suffer from the following constraints: 1. The nearest clinic is far away from his city of residence. 2. The accessible clinic is not affordable. 3. Autism is stigmatized and family does not agree for treatment due for the stigmatized and family does not agree for treatment due for the stigmatized and family does not agree for treatment due for the stigmatized and family does not agree for treatment due for the stigmatized and family services: 1. A social networking platform for autists, their friends and family members and medical professionals. 2. Online training portals which would comprise of both a preliminary (automated) and advanced training and would serve as a place for the autists to learn about the rules of the neurotypical world while concurrently getting regular feedback. 3. A practice aerna where autists can identify their strengths by performing a myriad of tasks with would mirriic the real world as closely as possible. This would help them to choose a path of life that is most conducive to their strengths.	
0.00 PM			DA HOTIKDE	3 . 3 .	YaCy	0	The talk takes the audience into the world of version controlling	
2:30 PM	izvisitak	Ratan	DA-IICT/KDE	Lightning Talk	Its Git to play with ;)	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)	primarily Git Version Control. Git is a tool which is indispensable in today's entrepreneurial generation besides having an utmost importance in open-source software development and industry. The talk requires no prerequisite. The demonstration and hands-on github session would enable confident on version control system and go out feeling confident on version control system.	
	Jonathan "Duke"	Leto	Leto Labs		Git Your City Together	Wobile, Alidroid)	Git is a fundamentally new kind of version control system that is changing how the world develops software. PDX Git Together was formed to bring together people interested in Git in Portland, Oregon and was the first Git user group in the world, followed quickly by groups in Germany and France. In this talk you will learn all you need to know to help form or take part in a Git user group in your city.	
3:00 PM	Sudheesh	Singanamalla	Red Hat	Talk of 25 minutes	Visualization and its usage in good governance.		In this age of big and open data, a world of freedom and a time when people are volcing their views to their respective governments. Many a times, these opinions and social media have resulted in changes to the way the country functions and views its citizens, e.g. Egypt. The open data is now being strictly monitored and internet censorship is taking on the authorities who want to control the levels of public freedom of expression. This talk aims at visually identifying cases where there have been changes to the functioning of the government making the governance more open and at the same time gives the speakers view of how visualisation of open data could by itself encourage governments to take the right decisions for its citizens and significantly reduce the amount of effort needed for its analysis due to its visual nature.	
3:30 PM	Jacqueline	Rahemipour	sipgate GmbH	Talk of 25 minutes	What Open Source has in common with Agile Development	Open Source and Free Software	At a glance Open Source and Agile Development do not seem to have much in common. But, if you take a closer look on functioning and motivation of the participants some similarities rise: Self organization of teams, distribution of knowledge and the ,multi-ey-principle. In both worlds you find an atmosphere of transparency, candidness and a common goal instead of egocentric career ambitions and status thoughts. While Open Source projects usually focus on the benefit of the common state of the common goal instead of egocentric career ambitions and status thoughts. While Open Source projects usually focus on the benefit of the common state o

	Estu	Fardani	GNU/Linux Bogor	Lightning Talk	Indonesia for Host GNOME Asia Summit 2015	Community Hours	The GNOME. Asia Summit is the featured annual GNOME Conference in Asia. The event focuses primarily on the GNOME desktop, but also covers applications and the development platform tools. It brings together the GNOME community in Asia to provide a forum for users, developers, foundation leaders, governments and businesses to discuss both the present technology and future developments. The next GNOME. Asia Summit will be the first time held in Depok, Indonesia.	
	Barbara	Cimpa	EdgeWorks German R&D Ltd.	Lightning Talk	Tiny quality management system or SME	Business & QM	Quality management, "CMMI". an organisation follows a rule system Everyone knows required steps. Everyhody knows the task that everyone knows required steps. Everyhody knows the task that everyone else is working on. Such 'work system' could be audited e/ cehcked if compliant to a known framework). If so, a 'oertificate' is given (CMMI level x, ISO 9001,) A company with such certificate produces 'quality' - steps and outcome are transparent, repeatable, and as expected. Or company with such certificate produces quality - steps and outcome are transparent, repeatable, and as expected. Or company with such sections are stated to implement a quality system. An entire department is in charge of the supervision of the system. Specialist's are hired and trained to keep such system run - overhead costs. Small companies or start-ups arredy do it. They neither have resources nor staff to even start it. While; such system does not have lemented in a 'minimal configuration', where almost everyone in a company is involved with a few hours per month. The only requirement: more than 1 project. The quality system to introduce during this conference is in use today, by an European software development company of approx. 600 people, accomplishing projects of a value of 1 Mio. USD. It is in use since 15 years, and it was started while the company was small, with approx. System is suitable for organisations of any size. And - the company where it is in use, today, achieved CMMI-DEV level 3 with that system.	
	Hui	Tong	Beijing GNU/Linux User Group	Feature Talk	How we learnt from Beijing GNU/Linux User Group Governence	Community Governance	In this talk, I would like to share some experience on how we learnt from governing Beijing GNUL/Inux User Group. It shows some very funny things in China, but how we could resolve it, and how we deal with such commercial and community-based matters. And further more, I will try to give a new way to average could we build a better community.	
3:00 PM	Shwetank	Dixit	Opera Software	Talk of 25 minutes	WebRTC: P2P and more using open web standards	Open Source/Free Software (Web, Java, JS, Git, Apps, Mobile, Android)		
3:30 PM	Kiran	Jonnalagadda	HasGeek	Talk of 25 minutes	Building software to bring together open source developers in India		HasGeek is a four year old startup, a community, a collection of open source tools and a platform for open source developers to meet and learn from each other. In this talk, I will explain how we built India's largest community of open source developers and built tools to help them collaborate. HasGeek's tools and processes are used for several high profits conferences in India — JSFo, Meta Refresh, The Fifth Elephant, Rootconf and Droidcon India – and even by community-organised events like PyCon India.	
4:00 PM		Pettersson	eKita & TechGrind		Creating an OpenSource Economy	DevOps	We would like to share how we are creating an actual economy of tech innovation in Asia on the opensource model and principles. TechGrind is a project that is an actual legal entity spanning multiple regions a cross Asia and is building the core components of a thriving tech-innovation industry as an entire array of legal entitles operating on an opensource model. We'd like to share how we are doing this, what our inspiration for this is, and of course as goes with all opensource projects: invite everyone to join us.
